Performance Disclosure: The performance data quoted here represents past performance, pulled on 12/29/2023. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The market price is the most recent price at which the fund was traded. Past performance is no guarantee of future results. For performance data current to the most recent month end, please call toll-free 833-906-5569.

### Important Risk Disclosures

#### Definitions:

**Alerian National Security Emerging Markets Index** is designed to exclude companies benefiting end-users that threaten the national security interests of the United States. The Index is calculated and sponsored by VettaFi, LLC, which is an organization that is independent of the Fund; Tuttle Capital Management, LLC; Northern Lights Distributors, LLC; and National Security Index, LLC.

**NAV Return** represents the closing price of underlying securities.

**Market Return** is calculated using the price which investors buy and sell ETF shares in the market. The market returns in the table are based upon the midpoint of the bid/ask spread at 4:00 pm EST, and do not represent the returns you would have received if you traded shares at other times.

While the shares of ETFs are tradeable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of market stress. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETF's net asset value. Brokerage commissions and ETF expenses will reduce returns. There is no guarantee that the Fund will achieve its objective.

ETF's are subject to specific risks, depending on the nature of the underlying strategy of the fund. These risks could include liquidity risk, sector risk, as well as risks associated with fixed income securities, real estate investments, and commodities, to name a few.
